## THE STEPS TO SUCCESS

USING THE ONLY NON-THERMAL DEVICE CLEARED BY THE FDA FOR NEW  
CLEAR NAIL GROWTH AT 6 MONTHS

### OPTIMIZING LunulaLaser®

Lunula Laser is the most advanced model of non-invasive healthcare lasers. Equipped with all of the latest technology from Erchonia Corporation, Lunula targets foot fungus and Onychomycosis. Here are a few steps to optimize Lunula's program and reinfection prevention:

- Sterilize all shoes you have worn during foot fungus infection.
- Practice good foot hygiene:
  - Scrub toes daily while showering
  - Pedicures should be received at only reputable salons with sterilized equipment, only your nail polish and removal should be used.
  - Wear slippers if you visit public showers (like at the gym or health spas).
- If you have a spouse, have them complete the Lunula Laser Treatment during the same time as your treatment.
- Use antifungal spray after wearing closed toe shoes.
- Use an anti-bacterial cleaner on your shower after your last Lunula Laser treatment.
- Keep to your Lunula Laser scheduled treatments.
